WORK EXPERIENCE

December 2011 – present
 (4 years and 3 months)

Managing director

Semiotics – www.semiotics.be - Gent, Belgium

Semiotics: "directing science to the heart of society". Semiotics is dedicated to translating science and scientific insights to anyone who can benefit from it or to anyone who is responsible for taking action. We have a vision that was inspired by Simon Sinek's golden circle: WHY? HOW? WHAT? Ever wondered why the Wright Brothers were the first to fly an airplane (and so many other engineers were not)? Or why Martin Luther King became the spokesperson of the civil rights movement (and so many others fighting for the same cause did not?) Because they thought, acted and communicated so very differently. Most organisations know what they do, some know how they do it (and know their USP's for example), but few of them know why they do what they do (besides making a profit). We have the privilege of working for scientists, for people who know why they get out of bed every morning. We believe that science and scientific insights make a difference and that the world should know about it. We are dedicated to translating science to the world.

Business or sector COMMUNICATION

December 2014 – present
 (1 year and 3 months)

Co-founder

One Health Platform – www.onehealthplatform.com

One Health recognizes that the health of humans, animals and ecosystems are interconnected. After all, approximately 75% of the new emerging human infections have their origin in zoonotic agents, meaning that they are naturally transmitted from animals to humans. Other infectious agents rely upon vectors, such as mosquitoes, ticks or sandflies to transmit from one host to the other. In addition, environmental and ecosystem health negatively influence human and animal health through issues like contamination, pollution and poor conditions that may lead to new infectious agents. Therefore health science professionals, key opinion leaders and public health officials need to work together to attain optimal health for people, domestic animals, wildlife, and our environment. The One Health Platform is an international Foundation that wants to offer the framework for information-sharing at all levels – for health scientists, ecologists, social scientists, policy makers and industry. Professor Ab Osterhaus and Professor John Mackenzie are the co-founders. Prof. Ab Osterhaus is the CEO of Artemis One Health Foundation. In addition, he is Professor of wildlife virology and virus discovery at the Utrecht University. He is the director of the newly established Research Center for Emerging Infections and Zoonoses at the University of Veterinary Medicine in Hannover, Germany. Professor John Mackenzie is a Research Associate & Professor of Tropical Infectious Diseases at Curtin University, Australia

Business or sector PUBLIC HEALTH COMMUNICATION / SCIENCE COMMUNICATION

2013 – present
 (3 years)

Co-founder

Mugas Foundation – www.mugasfoundation.net

Multiparty Group For Advice on Science (MUGAS) Foundation. MUGAS meetings aim to enhance public health security by addressing unsolved scientific issues that hamper public health guidance. More specifically, the MUGAS concept has been designed to bring benefit to society, in an open and transparent environment that allows in-depth discussion based on the latest scientific data. To that end, the MUGAS initiating partner(s) explicitly call upon all parties involved to share their views and have their voices heard. MUGAS meetings can be initiated by any scientist or research institute who aims to improve public health in Europe. The first MUGAS meeting was about the "review and statistical analysis of oseltamivir data".

- September 2013 – Present
(2 years 6 months)
- Communicator EU FP7 projects**
- Responsible for communication and dissemination of study outcomes resulting from EU funded research programs.
Business or sector PUBLIC HEALTH COMMUNICATION / SCIENCE COMMUNICATION
- January 1998 – Present

- Organiser and coordinator**
- European Influenza conferences - eswi.org/influenzaconferences
- Riga, 14-17 September 2014 / Riga, 10-13 September 2017
- The European Scientific Working group on Influenza (ESWI) organized the fifth edition of its ESWI Influenza Conferences in Riga, Latvia, on 14–17 September 2014. Over the past 11 years, the ESWI Influenza Conferences have grown into the largest European scientific conferences entirely dedicated to influenza. In keeping with its excellent scientific reputation, the fifth edition gave the floor to the most renowned influenza scientists. Additionally, the conference had a second, tailor-made programme for public health officials and opinion leaders in healthcare work. They were given the opportunity to participate in a series of seven sessions that covered the entire spectrum of influenza policy making. We are responsible for the overall organization of this triennial event. www.eswiconference.org. Next edition: Sixth European Influenza Conference, Riga, 10-13 September 2017.
Business or sector EVENT COMMUNICATION
- January 2016 – Present
(2 months)
- Organiser and coordinator**
- Fifth International One Health Congress – Saskatoon, Canada
- Bringing the One Health Community together at a Scientific Meeting (2000 pax) of 4 days. Separate Science Policy Interface will be included in the programme.
Business or sector EVENT COMMUNICATION
- April 2012 – Present
(3 years 11 months)

- www.sit-movies.org

- Developed a brand new concept (trademarked) to bring science closer to people, in a fun way, in a comprehensive way.
Business or sector SCIENCE COMMUNICATION
- January 2005 – Present
(11 years 2 months) **Executive Coaching**
Executive coaching - on personal professional level / communication / performances for several people - names not to be mentioned here.
Business or sector HUMAN RESOURCES
- October 2011 – September 2014
(3 years) **Communication advisor**
Viroscience lab, Erasmus MC Rotterdam
Strategic communication advice and implementation. From Department of Virology to "Viroscience lab, where skills meet to study and protect".
Business or sector CORPORATE COMMUNICATION
- June 2011 – May 2012
(1 year) **Strategic communication advisor on NEED**
Cirion Foundation, Viroscience lab
Development of "NEED" - Neglected Emerging Exotic Diseases" - a fundraising tool - goes hand in hand with an educational campaign towards young people.
Business or sector SCIENCE COMMUNICATION
- January 1997 – October 2011
(14 years 10 months) **Managing Director**
LINK INC
Running an agency that brought "social marketing" to the Flemish/Belgian market and abroad. Decided to bring it more on an international market (started already in 1997) and founded Semiotics in 2011.
Business or sector SOCIAL MARKETING
- October 2006 – November 2007
(1 year 2 months) **Strategic communication advice**
Green party Flanders
Strategic communication advice and positioning of the party for the election for the Federal parliament in 2007. Result: representation of the party in Federal parliament (non existent since elections 2003)
Business or sector POLITICAL COMMUNICATION
- January 1999 – September 2007
(8 years 9 months) **Communication advisor**
King Baudouin Foundation
Communication advice on several projects: "cultural heritage", "inclusion programs", "corporate social responsibility in Belgium and Europe".
Business or sector NOT FOR PROFIT COMMUNICATION
- January 2006 – January 2007
(1 year 1 month) **Strategic communication advice**
Viral Hepatitis Prevention Board
Positioning the organization
Business or sector SCIENCE COMMUNICATION
- February 2004 – February 2005
(1 year 1 month) **Strategic advisor – communication expert**
CSR Europe
Communication advice on how to involve local (national) partner organizations in the European organization.
Business or sector STRATEGIC COMMUNICATION / FACILITATION
- August 2003 – October 2004
(1 year 3 months) **Strategic consultant communication – free lance**
Green party of Flanders
Strategic communication advice - elections Flanders - from 2, 8% (2003) to 7,6 % in Flanders, 9,8% in Brussels and 8% European Parliament (2004). From "Agalev" to "Groen!" and the campaign "De bal ligt in uw kamp".

Business or sector POLITICAL COMMUNICATION

February 2002 – June 2004
(2 years 5 months)

Strategic advisor

NGO Federation (Coprogram) – development coordination

Strategic advice on the position of the organization and collaboration between member organizations.

Business or sector STRATEGIC COMMUNICATON / FACILITATION

January 2001 – November 2003
(2 years 11 months)

Free lance consultant – strategic marketing advice

EU Ecolabel – DG Environment

Development and implementation of marketing actions for the EU Ecolabel.

Business or sector MARKETING COMMUNICATION

January 1992 – January 1996
(4 years 1 month)

Communication officer & fundraiser

Amnesty International

Business or sector NOT FOR PROFIT COMMUNICATION

EDUCATION AND TRAINING

1989-1991

Bachelor of Science (BS), Applied Communication Sciences

COMMUNICATION HIBO, GHENT

- Theory of communication science / applied communication/ AV / copywriting and editing/management and coordination of projects – project management

1987 - 1989

Bachelor of Science (BS), Marketing

MARKETING, ANTWERP

- Marketing theory / market research and survey techniques / statistics/ product placement/ market communication

Synopsis of the book**CHEERS TO YOUR HEALTH!**

Strengthening the role of scientists in the public health debate

16 March 2015 saw the publication of "Communiceren op uw gezondheid" (English working title: Cheers to your health!), a book authored by professor of virology Ab Osterhaus and communications expert Chris Vanlangendonck. In this new publication, academics are urged to play a more active role in the public health debate. After all, their scientific knowledge and expertise puts them in a perfect position to provide advice to decision makers, to inspire healthcare workers and to correctly inform the general public. This is of critical importance in our modern era where information is omnipresent. And so is disinformation. Unfortunately, however, disinformation about public health themes can cost patients' lives or cause unnecessary panic. The latter was clearly the case during the recent Ebola outbreak. Which leads the authors to conclude that scientists can no longer stand idly by. On the contrary, academics can and should contribute to improving public health policy. To that end, scientists need to adapt their communication strategies, tailoring their messages to decision makers and the general public.

The authors illustrate their conclusions and recommendations with examples and anecdotes, taken from their long and fruitful collaboration on the intersection between science, health policy and communication. They dilate upon the opportunities and pitfalls in establishing press relations, in "translating" scientific research and in cooperating with the pharmaceutical industry. But above all, "Cheers to your health!" provides some clear views and concrete guidelines for scientists, policy makers, industry representatives and healthcare workers to join forces in order to contribute to a sustainable health policy.
